

Part 6 – Assign One RNA-Seq Sample to Each Student

Run accession	Condition	Bio. replicate	Single-end or paired-end	Approximate file size, if available
SRR23869378	Treatment — 72 - hour salt stress	R1	Paired - end	1.8 GB

Part 7. Download the RNA-Seq Data into Galaxy

The screenshot displays the Galaxy web interface for a job titled "Download accession: SRR23869378...". The interface is divided into several sections:

- Job Information:** Shows the Galaxy Tool ID, Job State (OK), Created/Updated timestamps, Time to Finish, and the Command Line used for the download.
- Task Standard Output:** Displays the progress of downloading the accession.
- Job Parameters:** A table listing input parameters and their values.
- History:** A sidebar on the right showing the job's history and a search bar.

Job Parameters Table:

Input Parameter	Value
Select input type	accession number
Accession	SRR23869378
Select output format	gzip compressed fastq
idx	
Output format specification for sequence	@6ac,5ac,5mp,5ri
Minimum spot ID	not available
Maximum spot ID	not available
Minimum read length	not available

Figure 2. Downloaded RNA Sequence data from NCBI into Galaxy.
